

OBJECTIVES

The main objective of the UAB-GRODE project: XEC3
"Network of Expertise, Shared Building of
Knowledge "is to create a network of knowledge exchanges
in Through mentoring, by the senior generation,
of the research work: TFG, Masters or groups.
To achieve this you need to:

- Make available to students and faculty the know of the senior people
- Promote intergenerational relationships to share knowledge
- Visualize the senior generation not as a recipient and user of services but as an agent in the search by contributing yours knowledge
- Promote innovative experiences in institutions
 University students favoring the incorporation of the senior generation

to the centers.

• Favor that professional experiences of real life and Also personal enter the research and construction process of knowledge
